

WORKSHOP ON DYNAMICAL SYSTEMS AND APPLICATIONS

The aim of the workshop is to bring together researchers working on different aspects of dynamical systems and to create opportunities for sharing and discussing latest results as well as for fostering new and ongoing collaborations. The focus will be on the confluence of interdisciplinary research involving dynamical systems.

Contributions are invited in the broad area of dynamical system theory including, but not restricted to:

- Dynamical systems arising from PDE, ODE, delay-DE
- Theoretical, numerical and computational aspects
- Applications to biology, population dynamics, celestial mechanics,

SCIENTIFIC COMMITTEE

Luis Vega, UPV/EHU & BCAM
Elena Akhmatskaya, BCAM
Philipp Getto, TU Dresden

CONFIRMED SPEAKERS

Julyan Cartwright, CSIC-University of Granada
Diego Gonzalez, CNR-University of Bologna
Holger Teismann, Acadia University
Jesús Palacián, University of Navarra
Dimitri Breda, University of Udine

LOCAL ORGANIZING COMMITTEE

Roberto Castelli
Julia Sánchez
Bruno Escribano
