Certain bilateral generating relations for generalized hypergeometric functions

Abstract

Recently, we introduced a class of generalized hypergeometric functions $I_n(b, q)/\alpha:(a, p)(x, w)$ by using a difference operator $\Delta_{x,w}$, where $\Delta_{x,w} f(x) = \frac{f(x+w) - f(x)}{w}$. In this paper an attempt has been made to obtain some bilateral generating relations associated with $I_n^{ga}(x, w)$. Each result is followed by its applications to the classical orthogonal polynomials.

Keywords

Generalized hypergeometric functions difference operator bilateral generating relations classical orthogonal polynomials
